## (54) ROOM-TEMPERATURE-CURABLE SILICONE SEALANT COMPOSITION

(57)Abstract:

PURPOSE: To prepare the title compsn. excellent in resistance to oil and long-life coolant by compounding a specific polyorganosiloxane, a specific silicon compd., TiO<sub>2</sub>, and a curing catalyst.

CONSTITUTION: 100 pts.wt. polyorganosiloxane having silanol groups at both molecular ends [pref. one shown by the formula (wherein R<sub>1</sub> and R<sub>2</sub> are each alkyl, alkenyl, aryl, or one of these hydrocarbon groups subst. by halogen, etc., and having a viscosity at 25° C of 500-200000 cP], 0.5-30 pts.wt. silicon compd. having at least two hydrolyzable groups directly bound to an Si atom in the molecule [e.g. methyltris(methylethylketoxime)silane], 10-200 pts.wt. TiO<sub>2</sub>, and 0.01-10 pts.wt. curing catalyst (e.g. dibutyltin dilaurate) are compounded to give the title compsn., which is excellent in resistance to oil and long-life coolant.
